

# DIRECTIONS

- 1 Add 10 drops of water to drug residue and mix.
- 2 Hold blue end of test strip and dip white end in water for 15 seconds. Don't go over the wavy lines.
- 3 Lay it down and result will appear in 2 minutes or less.

**1 red line means your drugs have fentanyl in them.**

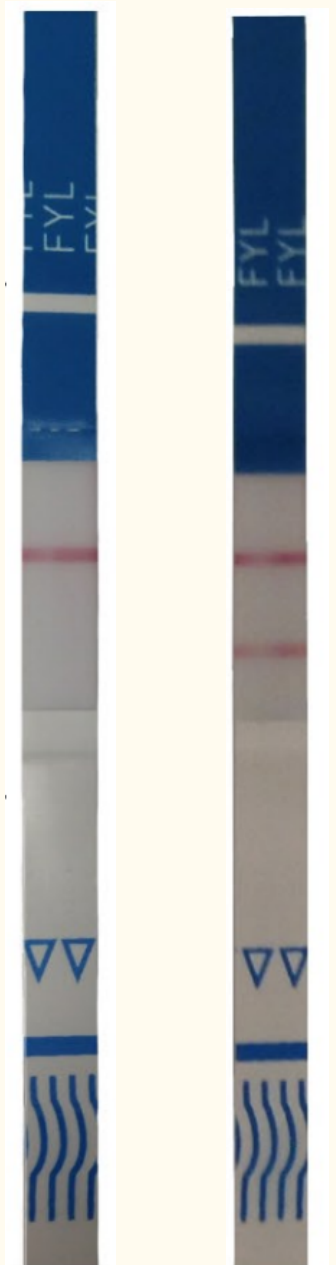

**2 lines means it is less likely to contain fentanyl, but please proceed with caution because it might not be the drug you paid for.**

## STAY SAFE

- Don't use alone and/or take turns.
- Have Narcan with you. Get it free from Project DAWN: 216-778-5677
- **Go Slow!** Start by using a little bit and wait to see how strong it is. If it feels off, be careful — consider not using it or taking less.

## READY FOR TREATMENT OR KNOW SOMEONE WHO NEEDS HELP?

- Call the 24-Hour Suicide Prevention, Mental Health/ Addiction Crisis, Information and Referral Hotline at **216-623-6888** for assistance.
